

Escape Map

This data (information) is current as of June 1, 2021.

List of Designated Evacuation Shelters

Designated evacuation shelters are buildings that fulfill a central role as evacuation points and are also meant for long-term stays.
The designated evacuation shelters' availability during flooding and the number of accessible floors are indicated based on the Mitaki Gawa Suikei's Mitaki Gawa, Kanatani Gawa, Yago Gawa, Mitakishinsen and Kaizo Gawa Suikei's Kaizo Gawa Flood-Prone Area Map. For the latest information, see the community disaster plan and any future hazard maps.

Name	Applicable disaster type		Barrier-free facilities				
	Flood (accessible floors)	Sediment disaster	Multipurpose toilet	Western toilet	Elevator	Handrail	Slope
Hazuchiku Shimin Center	○	○	○	○	○	○	○
Hazu Shogakko	○	○	○	○	○	○	○
Hazu Kita Shogakko	○	○	○	○	○	○	○
Hazu Chugakko	○	○	○	○	○	○	○

Barrier-free facilities

Multipurpose toilet available / Western toilet available / Elevator available / Staircase handrail available / Slope available

Legend

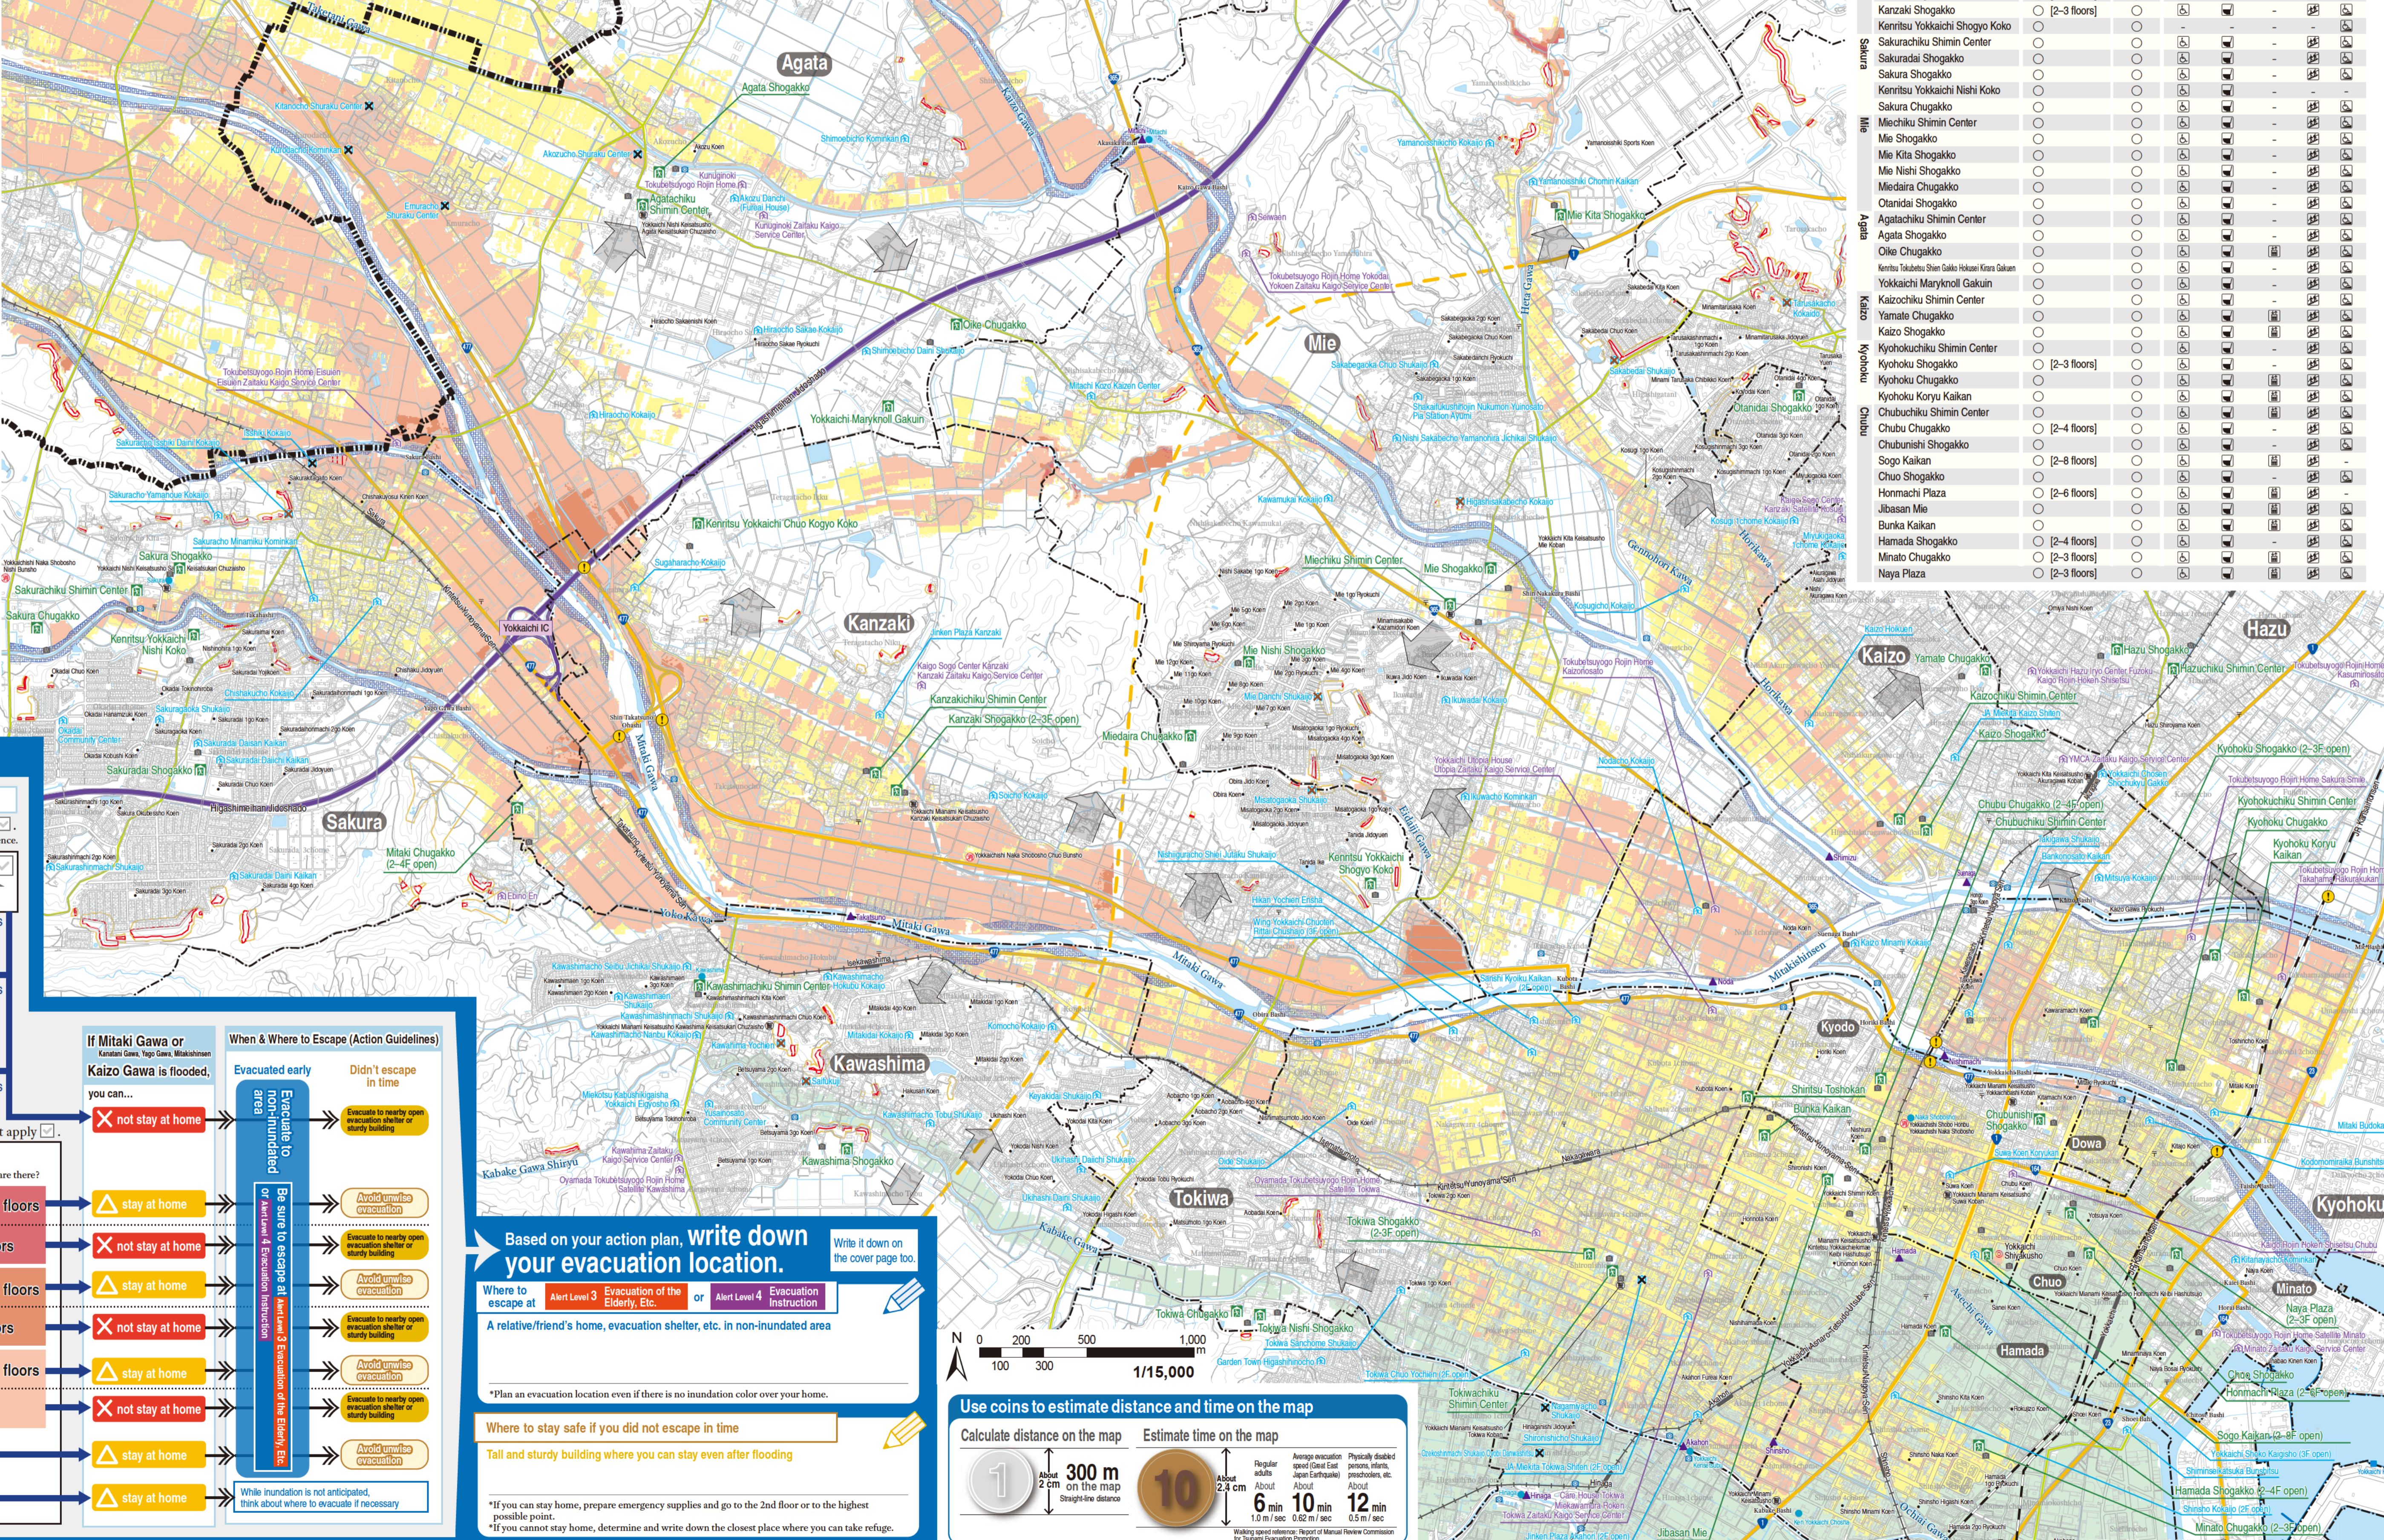

- Max. inundation depth: 5 m - Below 10 m
- Max. inundation depth: 3 m - Below 5 m
- Max. inundation depth: 0.5 m - Below 3 m
- Max. inundation depth: Below 0.5 m
- Expected Inundation Area (Tempaku Gawa / Kabake Gawa)
- Flood water (Overflow-Prone Area Where Houses Are Likely to Collapse)
- River bank erosion (Overflow-Prone Area Where Houses Are Likely to Collapse)
- Sediment Disaster Special Warning Area
- Sediment Disaster Warning Area
- Designated evacuation shelter
- Emergency evacuation shelter
- Closed off during flooding
- Closed off during sediment disaster
- Direction of escape
- Welfare evacuation shelter (secondary shelter)
- Government office
- Fire sta.
- Police sta.
- Post office
- Disaster administrative loudspeaker
- Water gauging station
- Rain gauge
- Tide gauge
- Emergency supplies warehouse
- Flood control supplies warehouse
- Underpass

Where to escape at: Alert Level 3 Evacuation of the Elderly, Etc. or Alert Level 4 Evacuation Instruction
Ex: A relative/friend's home, evacuation shelter, etc. in non-inundated area

Where to stay safe if you did not escape in time
Ex: Tall and sturdy building where you can stay even after flooding

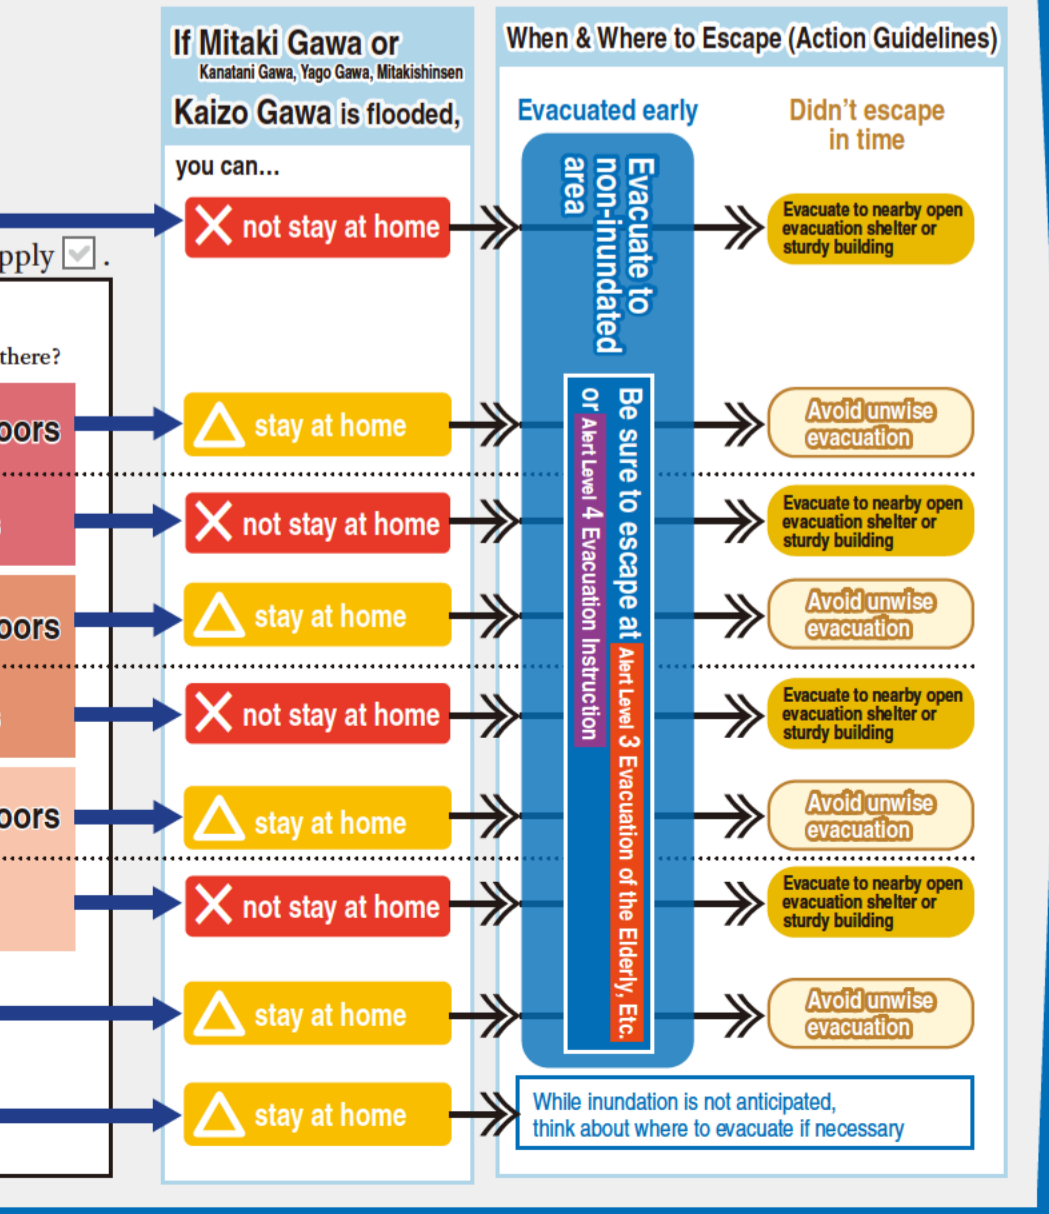

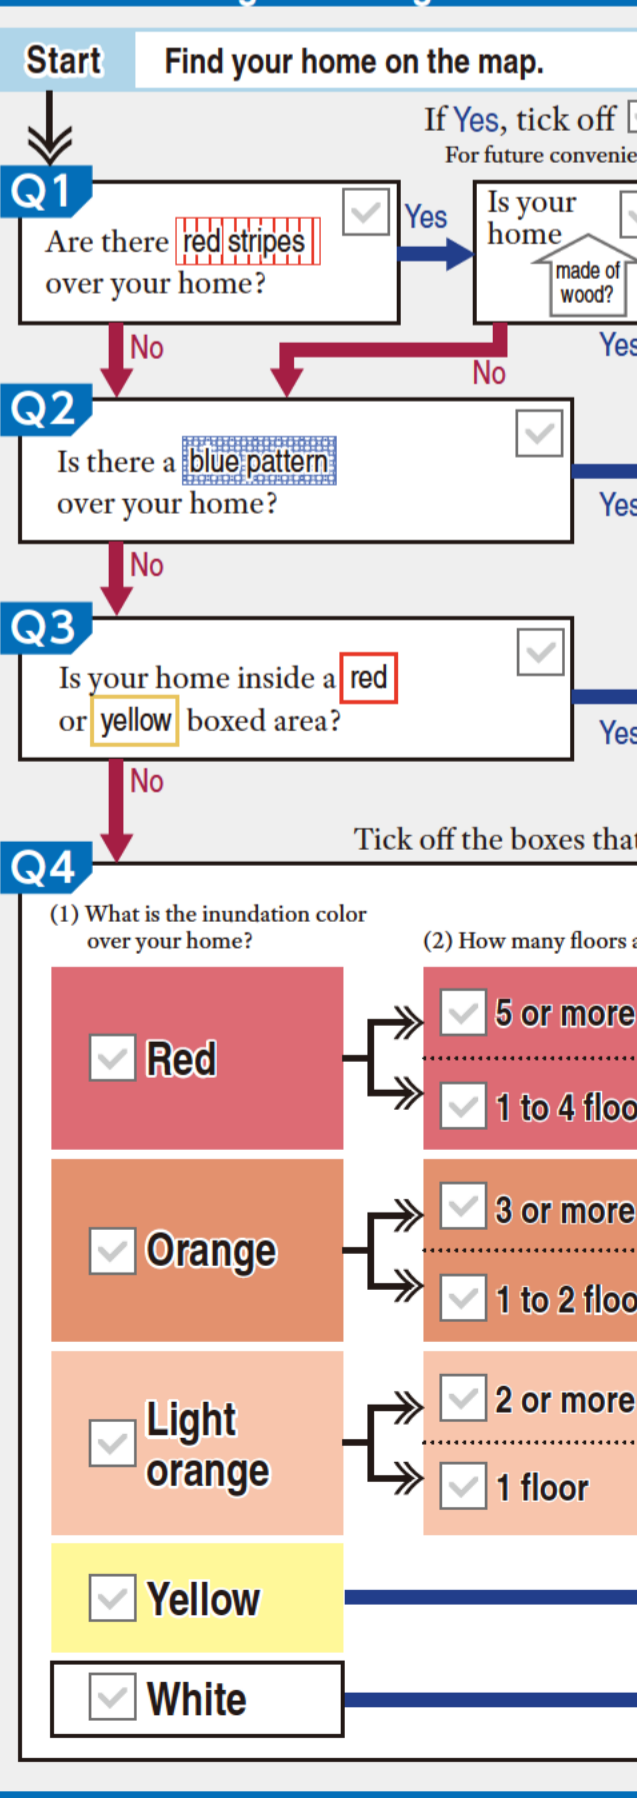

Use the flow diagram on the bottom left!

*This Escape Map is based on the following flood-prone area maps.
*The Tempaku Gawa Suikei Tempaku Gawa and Kabake Gawa Flood-Prone Area Map displays only expected inundation areas. Check the Awareness Map on the "Information" side as to which river (s) will affect your residential area.
Mitaki Gawa Suikei's Mitaki Gawa, Kanatani Gawa, Yago Gawa, Mitakishinsen and Kaizo Gawa Flood-Prone Area Map (maximum rainfall scenario)
Precedence rainfall for designation:
24-hour total rainfall in Mitaki Gawa Ryuiki 779 mm
24-hour total rainfall in Kaizo Gawa Ryuiki 828 mm
Released: September 22, 2017
Prepared by: Mie Prefecture URL: <http://www.pref.mie.lg.jp/>
Tempaku Gawa Suikei's Tempaku Gawa and Kabake Gawa Flood-Prone Area Map (maximum rainfall scenario)
Precedence rainfall for designation:
24-hour total rainfall in Tempaku Gawa Ryuiki 828 mm
Released: May 7, 2019

Escape Map: Decision-Making Flow Diagram

Based on your action plan, write down your evacuation location. Write it down on the cover page too.

Where to escape at: Alert Level 3 Evacuation of the Elderly, Etc. or Alert Level 4 Evacuation Instruction
A relative/friend's home, evacuation shelter, etc. in non-inundated area

Where to stay safe if you did not escape in time
Tall and sturdy building where you can stay even after flooding

*If you can stay home, prepare emergency supplies and go to the 2nd floor or to the highest possible point.
*If you cannot stay home, determine and write down the closest place where you can take refuge.

Use coins to estimate distance and time on the map
